ivNOW®

Fluid Warming

Warm fluids at the point of use - where you need them, when you need them. The convenient, easy-to-use ivNOW fluid warmers quickly heat and maintain safe temperatures of intravenous and irrigation fluids while saving space and staff time. Improve processes and recovery time by efficiently warming patients from admission to discharge, reducing surgical site infections.

Safety: The digital display shows the actual temperature of every bag throughout the warming process. The fluid warmer records how long each bag has been warmed in order to comply with healthcare regulations and to reduce waste. When the IV bag has been warmed longer than 15 days (user adjustable from 7-60 days), the ivNOW will flash DATE on the LED display to inform clinicians the limit has been reached and the bag should be discarded.

Easy-to-use: Place the IV bag in the pod to activate the unit. Fluid is automatically warmed up to 104° F (40 °C) in 30 minutes or less.

Convenient: Keep in patient or procedure rooms with this versatile model.

Service: Our worldwide support team is dedicated to providing quality equipment. We walk with you every step of the way to maximize your return on investment.

Made in the USA with a commitment to quality
An ISO 13485:2016 certified company

Standard Features

- Anodized aluminum heat plate
- Lightweight, medical grade plastic housing
- Accomodates 0.5L, 1L, 2L & 3L bags
- Field customizable pod configuration
- Intelligent bag sensors
- Dual temperature sensors

ivNOW-1: 1 bag
0.5 - 3 liters

ivNOW-2: 2 bags,
1 - 6 liters

ivNOW-3: 3 bags,
1.5 - 9 liters

TEMPERATURE

Heats to
40°C (104°F)
Accurate temperature
+0/-2°C (-3°F)
